Verify each of the following items with a corresponding checkmark. Incorrect items will incur a 5% penalty on the grade.

Complete	Incomplete	App store project 1
☑	☐	Created an innovative idea for a simple, yet compelling app. As Apple puts it, your App should do something useful, unique, or provide some form of lasting entertainment.
☑	☐	Done market research on the 4 most popular apps that are most similar to your idea. 1. Word Stacks 2. Word Falls 3. Worddrop 4. LetterFall
☑	☐	**Your app is better, faster, easier, cheaper, safer, or more fun than the apps listed above in at least three ways:** (1) Wildcard character to help form words (2) Scores saved to db to _____ challenge friends, (3) very easy to play and have fun!
☑	☐	**Design documents** (UI including View controllers, Tab bar controllers, Navigation bar controllers, widgets, frameworks), **signed off on by instructor**
☑	☐	Identified the MVP (the minimum viable product) that can be tested by users, and the first few versions of improvements. List the MVP and iterations here: MVP. Letters fall and form words v2. Add a button to slowdown fallspeed "powerup" v3. Make levels score based v4. Add different languages.
☑	☐	**Set up a Trello account w/ a project plan** of tasks to be done, hours needed, & schedule
☑	☐	Using the programming techniques we have learned so far (chapters 1-15), have implemented the App so that it compiles and runs without runtime errors.
☑	☐	Invested at least **20** hours in your App. Apple says, *"If your App looks like it was cobbled together in a few days, please brace yourself for rejection."*
☑	☐	Chose and implemented the monetization strategy: none, in-app purchases, ads within the app, or premium versions that users must upgrade to for full app functionality.
☑	☐	App's UI uses space well, with constraints correctly set, on **iPhones and iPads in landscape and in portrait mode.** Do NOT restrict your App to run only in Portrait mode.
☑	☐	Met App Store's Safety, Performance, Business, Design, and Legal (data collection, use, sharing) requirements: https://developer.apple.com/app-store/review/guidelines
☑	☐	Published to App store: DropAWord 3/16/19 by: Appility
☑	☐	Project directory pushed to new GitHub repository listed above using GitHub client.
